

OFFSHORE ACCOUNTING

In-house accounting services will always be expensive as the company has to bear inflation in every aspect – hiring, training, resources used for it, and most importantly, the minute monitoring by management. Whereas, it is different with offshore accounting services: you get top-notch services at a reasonable cost. Moreover, the price factor is crucial for any business. Destinations like India, Mexico, etc. are popular for offshoring accounting.

1

BOOKKEEPING SERVICES

Bookkeeping means recording and organising all the financial data like invoicing, billing, payroll calculation and reconciling statements.

2

TAX PREPARATION

Tax preparation includes preparing tax, calculating tax, & filing tax, income tax returns, and excise tax filing.

3

FINANCIAL STATEMENT PREPARATION

The financial statement consists of a balance sheet, and income statement along with having an eye on the company's cash flow.

4

PAYROLL SERVICES

Outsourced Payroll services will help you in managing all the records of employees' salaries and the cash flow

5

YEAR-END ACCOUNTING

Year-end accounting involves the collection of financial statements and invoices that are left to be paid, sequencing business receipts, double-checking payroll and bookkeeping, etc.

70%

of companies are choosing offshore accounting as their accounting partner.
